(57) Abstract:

A technique of automated learning that is revealed here helps users to enhance their performance on tests consisting of multiple choice questions. The learning strategy incorporates a variety of elements and implementations; nevertheless, in general, the innovation requires test-takers to exercise their examination abilities and subject matter knowledge in a methodical manner. The method that is systematic compels users to adhere to a tried-and-true strategy for problem-solving that is intended to enhance their level of performance. Users are given valuable performance feedback as a result of the innovation, such as the amount of time that has gone between questions and the proportion of questions that they have properly answered. The innovation additionally has the capability of highlighting for the user the particular substantive aspects of the test in which the user either excels or struggles. In addition to this, the innovation is able to provide assistance to the user in anticipating the final score that they will get.
