ABOUT THE EVENT

QUANTANOVA v1 is a thrilling 24-hour hackathon happening on the 19th and 20th of July 2025, designed to bring together brightest minds from various colleges to test their technical mettle and creative spark. The event unfolds in multiple levels, offering participants a dynamic platform to compete, collaborate, and create.

The hackathon kicks off with Byte-Sized Battles, a high-paced coding quest that challenges participants to tackle logic-driven puzzles and rapid problem-solving tasks under pressure. This is followed by the highlight of the event — Idea2AI, a full-fledged development round where teams choose from domain-based themes and build innovative, AI-powered solutions that address real-world challenges. This round emphasizes creativity, critical thinking, and the ability to convert ideas into intelligent systems.

QUANTANOVA isn't just about code — it's about the experience. With food, fun, and surprises included throughout the event, participants can expect an electric atmosphere, late-night snacks, engaging mini-games, and moments to unwind. Teams of 2 to 4 members will compete not just for exciting prizes and bragging rights, but also for exclusive internship opportunities with reputed tech firms.
